# **1 Introduction**

This document describes the subset of the IFTMCS EDIFACT message which the carrier is using to submit manifest information to DAKOSY ICS for the purpose of filing an Exit Summary Declaration.

Based on this information, DAKOSY ICS will create and send the according ENS declarations to the first customs office at entry as indicated within the IFTMCS.

## 2 Data within the Exit Summary Declaration (EXS)

This document describes one of the messages used with ZODIAK ICS to send the Exit Summary Declaration to customs.

### 2.1 Data contained in the message

The core data elements used in the Exit Summary Declaration are laid out in Annex 30a to the EU customs codex. A link to this document can be found within this message guide in the section named “Further Information on ICS/ECS”.

**Local Reference Number (“Bezugsnummer”):** The Local Reference Number (LRN) is a reference assigned by the declarant which should allow the declarant to link a declaration to data in his own IT system. The LRN has to be unique per customer, i.e. it is not possible to use the same LRN twice, even for different countries / exit ports.

### 2.2 Customs Office Codes

For the first and subsequent customs offices at entry, ZODIAK ICS allows to use UN or IATA Location Codes instead of actual customs office codes. Please contact DAKOSY if you’re interested in using this possibility.

### 2.3 Specifics regarding certain EU countries

**(valid at the date of issue; see document footer)**

- **GERMANY:** German customs require to receive contact data for the person lodging the summary declaration, i.e. one has to provide at least the name and phone number of a contact person for the declaration.
- **SPAIN**
  - Required: Customs Sublocation (Element <CustomsSubPlace> on header level). An indication where the goods that should be exported are stored.
  - Required: Previous Document (Element <PreviousDocument> on goods item level. An information about the customs process that preceded the EXS
  - Optional: National Specific Circumstance Indicator
  - Optional: Document Operation

### 3 EXS Business Process

The Business Process for the Exit Summary Declaration is much simpler than the one underlying ICS. For many countries, the EXS Process will consist of just two steps:

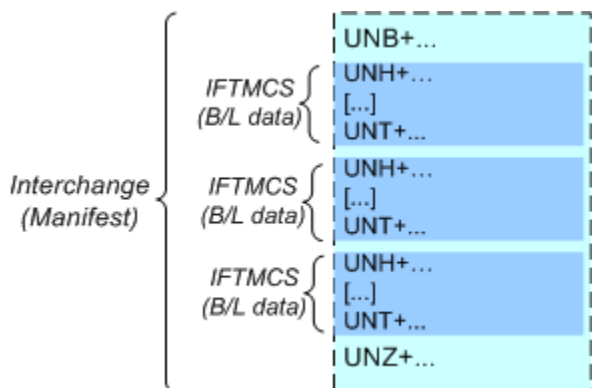

- Customer sends Exit Summary Declaration to Customs
- Customs return message containing MRN number

If customs decide to inspect the goods declared with an Exit Summary Declaration, it depends on the country of the customs office of exit how the declarant is being informed. In some countries (e.g. Germany<sup>1</sup>) customs will use Phone, Fax or eMail. In other countries (e.g. Malta) customs will use an EDI message which DAKOSY is going to forward to the declarant using an APERAK message.

## 4 Handling of the IFTMCS message

### 4.1 Sending manifest data in IFTMCS format

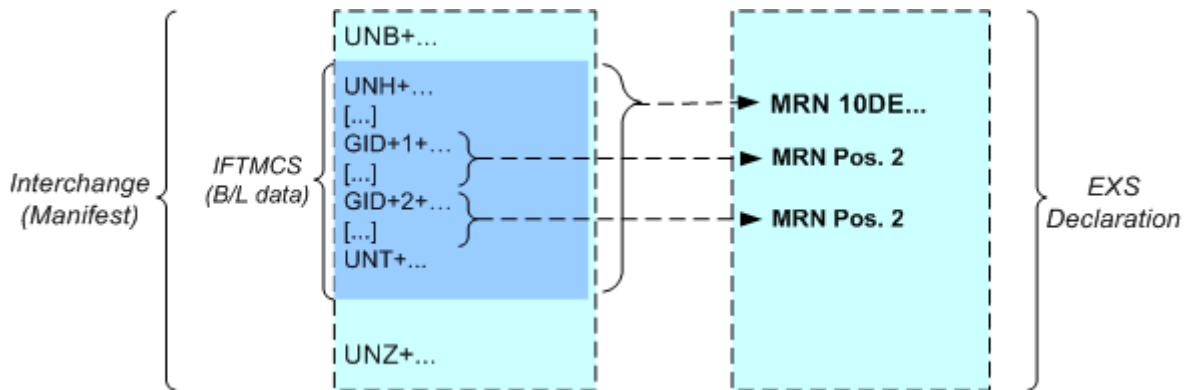

The EDIFACT message IFTMCS is designed as a “B/L Level” message and not as a manifest message. However, carriers may submit whole “manifests” by enclosing a number of IFTMCS messages in a single EDIFACT interchange.

<sup>1</sup> In the port of Hamburg, control notifications will be distributed via the ZAPP system

## 4.2 Conversion of manifest data to EXS declaration

DAKOSY will convert inbound IFTMCS messages into EXS declarations. This means, each IFTMCS message will result in a MRN number being generated at customs. The goods items contained in the B/L will be converted into MRN positions.

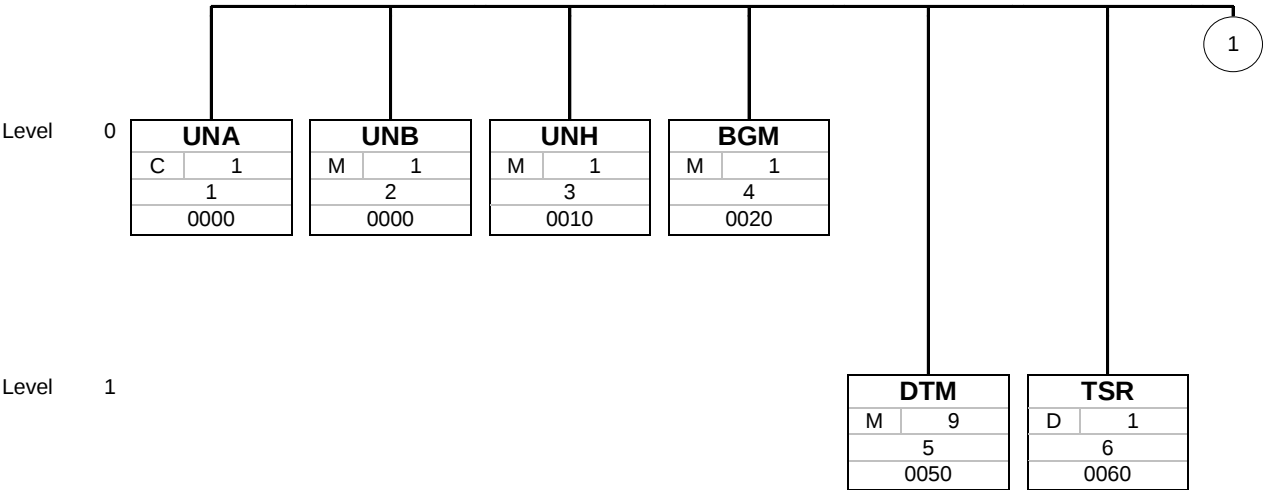

## **5     Message Structure**

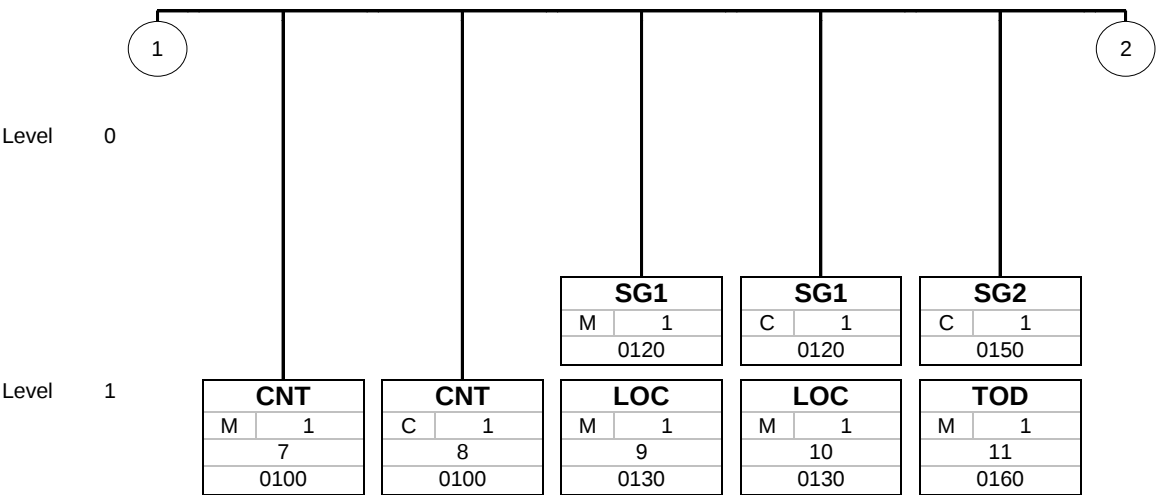

|  | Counte | No | Tag  | St | MaxOcc | Level | Content                                                                                                                                        |

## 8 Further information on ICS / ECS

On the EU's web site, a number of documents describe the specifics of ICS and ECS. Along with some FAQ documents, one can also find examples how to handle certain scenarios such as slot-chartering agreements or short shipped containers:

[http://ec.europa.eu/ecip/security\\_amendment/procedures/index\\_en.htm](http://ec.europa.eu/ecip/security_amendment/procedures/index_en.htm)

Another web site contains the original text of the Annex 30a, a document describing the changes to the EU customs codex which form the basis for the ICS and ECS regulations:

<http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2006:360:0064:0125:EN:PDF>
