Change history

Version	Chapter/ Section	Reason	Name	Date
1.0.0	0 3	Added Message Structure and Branching Diagrams Added segment DOC in SG18 to submit “Produced Documents / Certificates” as per TAXUD specs	Blanken	20.07.2010
1.0.1		(not published)		
1.0.2		Bugfix: Corrected Codelist for Segment TOD (Payment Method) Bugfix: Corrected format for customs offices (an8 instead of an..9)	Blanken	25.08.2010
1.1	All	Added possibility to indicate Location Codes instead of Customs Office Codes	Blanken	10.09.2010
1.2		Corrected length of Local Reference Number (22 instead of 35)	Blanken	15.10.2010
1.3		(not released)		
1.4		Bugfix: GID/MEA is not a mandatory element Bugfix: TDT, elements Carrier Identification, Vessel Name and Nationality are no mandatory elements. Bugfix: GID/FTX+AAA is not mandatory but an alternative to the commodity code Bugfix: GID/DGS/FTX+AAD is not a mandatory element Added NAD+MS/data element 1131 to be used for the “RIN” when sending declarations to Austrian customs. GID/FTX+AAA has been extended with data element 3453 (language of goods description); needed for Belgian customs. GID/PCI has been extended with data element 7511 (language of Marks & Numbers); needed for Belgian customs. Bugfix: NAD+CN/data element C082 is not a mandatory element Removed Version History older than Version 1.0.0		
1.5		(not released)		
1.6.0		Bugfix: Loading place optional if Special Circumstance Indicator (RFF+SC) = ‘A’ Bugfix: Unloading place is usually optional Added customs status (GID/FTX+AAH) for ENS to finnish customs Bulk Cargo should always be sent with number of packages = 1 Amended / Extended numerous segment and field descriptions	Blanken	31.03.2011

Version	Chapter/ Section	Reason	Name	Date
		Added field "Name Continuation" in NAD segment for ENS to finnish customs Correction: Added qualifier for Goods Description Correction: EQD / Element 8077 wasn't documented Fixed description for Customs Office of Lodgement		
1.7.0		Addition of Branch No.	Dietrich	15.09.2012
1.7.1		Advance Filing Rules Japan	Dietrich	10.02.2014
1.7.2		Edition of specifications in SG 11(1)/NAD, smaller corrections	Dietrich	29.01.2015
1.7.3		Addition of changes referring to declarations in Japan (New FTX segments (Information for the deletion of a B/L declaration/Abnormal Cargo Code), specification of phone no. in SG/RFF/COM in case of CZ, CN and N1 required, number of repetitions > SG/DGS up to 5 times)	Dietrich	20.07.2017

1 Introduction

This document describes the subset of the IFTMCS EDIFACT message which the carrier is using to submit manifest information to DAKOSY ICS.

Based on this information, DAKOSY ICS will create and send the according ENS declarations to the first customs office at entry as indicated within the IFTMCS.

2 Data within the Entry Summary Declaration (ENS)

This document describes one of the messages used with ZODIAK ICS to send the Entry Summary Declaration or Entry Summary Declaration Amendment to customs.

There are certain differences between the “original” and the Amendment message as well as certain specifics regarding the data that is sent to different countries. These are described in the following sections:

2.1 Data contained in the message

The core data elements used in the Entry Summary Declaration are laid out in Annex 30a to the EU customs codex. A link to this document can be found within this message guide in the section named “Further Information on ICS/ECS”.

2.2 Customs Office Codes

For the first and subsequent customs offices at entry, ZODIAK ICS allows to use UN or IATA Location Codes instead of actual customs office codes. Please contact DAKOSY if you’re interested in using this possibility.

2.3 Differences/Specifics regarding “Original” and Amendment message

- **Update Flag:** When sending an amendment message and using the EDIFACT IFTMCS message, data element BGM.1225 must have the value “5”, otherwise the message will be treated as a new original. When using the XML message EntrySummaryDeclaration, element <TypeOfDeclaration> must have the value “UPDATE”, otherwise the message will be treated as a new original.
- **Local Reference Number (“Bezugsnummer”):** The Local Reference Number (LRN) is a reference assigned by the declarant which should allow the declarant to link a declaration to data in his own IT system. Since Diversion Requests and Arrival Notices can be done on Entry Key level¹ while the ENS declaration usually will be done on shipment level², the Local Reference Number of Diversion Request and Arrival Notice can be different from the ones of the Entry Summary Declaration. However, changing the Local Reference of an Entry Summary Declaration with an Amendment is not possible. Also, the LRN has to be unique per customer, i.e. it is not possible to send the same LRN twice, even for different countries / entry ports.
- **MRN:** When sending an ENS Amendment, the message must contain the MRN assigned by customs to the “original” ENS declaration. I.e. it is not possible to update an ENS declaration before it was confirmed by customs.

2.4 Rules regarding amendments

The following is an excerpt from a document posted on the EU web site:

(http://ec.europa.eu/ecip/documents/procedures/import_entry_guidelines_en.pdf ; Chapter 8):

¹ The „Entry Key“ is data which allows the customs system to link vessel information to the MRNs for shipments on that vessel. “Entry Key level” basically means “Vessel Level”.

² However, there is no obligation to do so

The ENS declarant (see paragraphs 3 and 4 of Article 36b CC) shall, at his request, be authorised to amend one or more particulars of the summary declaration after it has been lodged (Article 36b (5) CC).

From a legal point of view, there is no restriction in the CC or the CCIP to amend one or more particulars of the ENS. However, the particulars concerning the person lodging the ENS, the representative and the declared customs office of first entry should not be amended in order to avoid technical problems.

Furthermore, it is not possible to amend an ENS after a diversion request has been accepted. The time limits for lodging the ENS do not start again after the amendment since it is the initial declaration that sets them. If at the time of amendment, the ship in deep sea container traffic has left the port of departure, a "no load" message cannot be issued.

When the particulars concerning the person lodging the ENS or the representative are not correct, a new ENS should be lodged, and the time limits laid down in Article 184a CCIP should wherever possible be respected in the case of the new ENS.

2.5 Specifics regarding certain EU countries

(valid at the date of issue; see document footer)

- **GERMANY:** German customs requires to receive contact data for the person lodging the summary declaration, i.e. one has to provide at least the name and phone number of a contact person for the declaration.

3. ICS Business Process

3.1 Use Case “Sending ENS declaration”

The diagram below describes the use case “Sending an ENS declaration” within the ICS business process.

Note 1: The roles “ENS Responsible” and “Carrier” will be embodied by the same entity in most cases.

Note 2: The EDI formats used for air freight differ substantially from the ones described here.

1. The ENS responsible sends declaration data to the EDI Provider (DAKOSY). The data is sent as an IFTMCS message (see chapter 3 ff. for details on the exact handling and contents of this message)

2.1. DAKOSY applies a number of plausibility checks to the IFTMCS message

2.2. If the plausibility checks find one or more errors, these errors are reported to the sender party with an EDIFACT APERAK message.

3. If no errors are found in step 2.1, DAKOSY will forward the E_ENS_DAT (ENS declaration message) to the first customs office at entry as indicated within the IFTMCS message. The exact EDI format used for communication with customs depends on the national regulations of the individual member states.

4. Customs will apply another set of checks to the inbound messages. If an error is found during these checks, an error message will be sent back to DAKOSY.

5. Otherwise, a message will be sent, stating that the declaration was accepted. This message will contain the MRN number assigned to the declaration.

6.1 – 6.3: Error messages (step 4) and/or registration information (step 5) will be forwarded to the ENS responsible and the carrier

7. For containerized sea freight, customs might reply with a “Do Not Load” message within 24 hours after the initial declaration.

8.1 – 8.2 The “Do Not Load” would be forwarded to ENS responsible and carrier with an EDIFACT APERAK message.

3.2 Use case “Sending ENS amendment”

The process for sending amendments to the ENS declaration is essentially the same as for sending the initial declaration (see 2.1) with some minor differences.

The party sending the amendment has to include the MRN number assigned to the original declaration within the data.

Also, the amendment might be sent by a third party (a “representative”) as indicated by the ENS responsible within the original declaration message.

3.3 Other use cases

ICS includes two additional use cases, “Diversion Request” and “Arrival Notice”. These are described in the documentation for the IFTSTA message.

4 Handling of the IFTMCS message

4.1 Sending manifest data in IFTMCS format

The EDIFACT message IFTMCS is designed as a “B/L Level” message and not as a manifest message. However, carriers may submit whole “manifests” by enclosing a number of IFTMCS messages in a single EDIFACT interchange.

4.2 Conversion of manifest data to ENS declaration

DAKOSY will convert inbound IFTMCS messages into ENS declarations. This means, each IFTMCS message will result in a MRN number being generated at customs. The goods items contained in the B/L will be converted into MRN positions.

5 Message Content Structure

ICS Field	EDIFACT Field	Remarks
Local Reference Number	BGM.C106.1004	Mandatory
---	BGM.C002.1001	Fixed Value "355" for ENS Declaration/Amendment
---	BGM.1225	'9' => E_ENS_DAT '5' => E_ENS_AMD
Declaration Date and Time	DTM.C507.2380	Mandatory
Total Gross Weight	CNT+7.C270.6066	Mandatory
Total Number of Items	CNT+2.C270.6066	Mandatory
Place of Declaration	SG1.LOC+91.C517	Mandatory
Method of Payment	SG2.TOD.4215	Optional
Commercial Reference Number	SG3.RFF+BM.C506.1154	B/L Number, Mandatory
MRN Number	SG3.RFF+MRN.C506.1154	Mandatory when sending updates
Conveyance Reference Number	SG8.TDT.8028	Optional
Mode Of Transport	SG8.TDT.C220.8067	Fixed Value "1", Mandatory
Identity of Means of Transport	SG8.TDT.C222.8213	IMO Number, Mandatory
Place of Unloading	SG9.LOC+11.C517.3224	PoD, Mandatory
Routing	SG9.LOC+11.C553.3233	Mapped to last routing item in ENS declaration, Mandatory
Place of Loading	SG9.LOC+9.C517.3224	PoL, Mandatory
Routing	SG9.LOC+9.C553.3233	Mapped to first routing item in ENS declaration, Mandatory
Code of first customs office at entry	SG9.LOC+41.C517.3225 (Element 5749 = 0)	Mandatory
ETA at first customs office at entry	SG9.DTM+132.C507.2380	Mandatory

Code(s) of subsequent customs offices	SG9.LOC+41.C517.3225 (Element 5749 = 1)	Mandatory if goods are shipped further into the EU
EORI TIN of Person Lodging the Declaration	SG11.NAD+MS.C082.3039	Mandatory
Address of Person Lodging the Declaration	SG11.NAD+MS.Cxx	Optional
Contact Person at Person Lodging Summary Declaration	SG11.NAD+MS/CTA & COM	Mandatory for German customs
EORI TIN of Carrier	SG11.NAD+CG.C082.3039	Mandatory if carrier should be mentioned in declaration
Address of Carrier	SG11.NAD+CG.Cxx	Optional
EORI TIN of Shipper/Consignor	SG11.NAD+CZ.C082.3039	Should be provided, if possible
Address of Shipper/Consignor	SG11.NAD+CZ.Cxx	Mandatory if no EORI TIN is provided
EORI TIN of Consignee	SG11.NAD+CN.C082.3039	Should be provided, if possible. Can be set to 10600 for "To Order" B/L
Address of Consignee	SG11.NAD+CN.Cxx	Mandatory if no EORI TIN is provided
EORI TIN of Notify	SG11.NAD+N1.C082.3039	Notify data is allowed only in case of "To-Order" B/L. Either TIN or Address has to be provided.
Address of Notify	SG11.NAD+N1.Cxx	Notify data is allowed only in case of "To-Order" B/L. Either TIN or Address has to be provided.
EORI TIN of Representative	SG11.NAD+AG.C082.3039	Mandatory if representative should be mentioned in declaration. Representative is a 3 rd party allowed to make amendments using E_ENS_AMD
Goods Item / Address of Representative	SG11.NAD+AG.Cxx	Optional
Goods Item / Number of Packages	SG18.GID.C213.7224	Mandatory
Goods Item / Type of Packages	SG18.GID.C213.7065	Mandatory
Goods Item / Commodity Code / HS Code	SG18.PIA.C212.7140	Mandatory if no Goods Description is provided
Goods Item / Goods Description	SG18.FTX+AAA.C108.4440	Mandatory, if no Commodity Code is provided
Goods Item / Gross Mass	SG20.MEA+AAE.C174.6314	Mandatory
Goods Item / Marks & Numbers	SG23.PCI.C210.7102	Optional

Produced Documents / Certificates	SG24.DOC	Dependent. Master B/L should be mentioned by a 3 rd party lodging a declaration
Container Number(s)	SG27.SGP.C237.3260	Should be provided for containerized freight
UNDG Code	SG30.DGS.C237.7124	Mandatory for DG Cargo
Seals IDs	SG35.SEL.9308	Should be provided if seals are used

TAXUD specifies the following information on the representative:

"The data group 'TRADER Representative' can be used by the 'PERSON Lodging the entry summary declaration' to authorise a Representative to amend an Entry summary declaration on his behalf at the Office of first Entry concerned.

If preventive/prohibitive measures are to be taken (IE351) or if controls at Entry are to be communicated to the trader prior to the arrival at Entry (IE351), the trader identified here, will be receiving the 'Advanced intervention notification' – IE351."

If the ENS is lodged by another party than the Carrier, then the transport document (e.g. Master B/L) of the Carrier should be declared, if available.

If the SpecificCircumstanceIndicator on header level is set to "E" then a transport document must be provided at least for the first goods item.

If no CommercialReferenceNumber is provided on header level nor for this goods item, at least one transport document reference must be provided.

9 Further information on ICS / ECS

On the EU's web site, a number of documents describe the specifics of ICS and ECS. Along with some FAQ documents, one can also find examples how to handle certain scenarios such as slot-chartering agreements or short shipped containers:

http://ec.europa.eu/ecip/security_amendment/procedures/index_en.htm

Another web site contains the original text of the Annex 30a, a document describing the changes to the EU customs codex which form the basis for the ICS and ECS regulations:

<http://eur-lex.europa.eu/LexUriServ/LexUriServ.do?uri=OJ:L:2006:360:0064:0125:EN:PDF>
